DETAILED ACTION

Allowable Subject Matter

1. Claims 1-27 are allowed.

The following is an examiner's statement of reasons for allowance: Claims 2 and 17 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 1 wherein the speed-increasing circuit (107) includes a PMOS transistor (108) in combination with the rest of the limitations of the base claims and any intervening claims. Claim 7 is allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 6 wherein a buffer circuit (201) is inserted at the output side of the second long-distance wiring (106) in combination with the rest of the limitations of the base claim and any intervening claims. Claims 8 and 23 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 7 wherein the input signal (VIN) is realized by a word line selecting signal; the driver circuit (100) is realized by a word line driver; the first long-distance wiring (104) is realized by a word line; and the gate circuits (103) are realized by memory cells in combination with the rest of the limitations of the base claims and any intervening claims. Claims 3, 10, 18, and 22 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 2 wherein the speed-increasing circuit (107) includes an NMOS transistor (110) and a buffer circuit (111) that is inserted at an input side of the second long-distance wiring (106) in combination with the rest of the limitations of the base claims and any intervening claims. Claims 4, 11, and 19 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 10 wherein the

speed-increasing circuit (113) includes a CMOS inverter having a PMOS transistor (114) and an NMOS transistor (115) in combination with the rest of the limitations of the base claims and any intervening claims. Claims 5, 12, and 20 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 4 wherein a plurality of speed-increasing circuits (107) are additionally inserted between an intermediate position of the second long-distance wiring (106) and the vicinity of the input terminal of the gate circuit (203) connected to a position corresponding to that intermediate position in combination with the rest of the limitations of the base claims and any intervening claims. Claims 6, 13, and 21 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 5 wherein a plurality of buffer circuits (200, 201) are inserted at the input side of the second long-distance wiring (106) in combination with the rest of the limitations of the base claim and any intervening claims. Claim 14 is allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 6 wherein a buffer circuit (201) is inserted at the output side of the second long-distance wiring (106) in combination with the rest of the limitations of the base claim and any intervening claims. Claims 9, 15, and 24 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 9 wherein the gate circuits (203) are realized by flip-flop circuits in combination with the rest of the limitations of the base claim and any intervening claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
